

About us

Frei AG, Hofenstrasse 18, 9300 Wittenbach, Switzerland

Dear Customer
Dear Business Partner

Frei AG supplies high-quality seam protection systems to the can making industry with a commitment to the global green agenda.

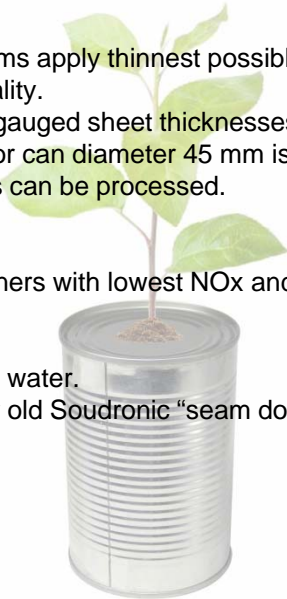

www.frei-ag.com

Coating:

- Our powder seam coating systems apply thinnest possible films.
- Powder monitors ensure the quality.
- The systems can run with downgauged sheet thicknesses of 0.1 mm.
- Narrow 7.5 mm powder stripe for can diameter 45 mm is possible.
- Standard and BPA-free powders can be processed.

Curing:

- High-performance ECO gas burners with lowest NOx and CO concentrations comply with any Clean Air Legislation.
- Efficient utilisation of energy.
- The systems run without cooling water.
- We offer new curing systems for old Soudronic "seam down" welders such as SBW and VEAW.
